Axesstel's MV440 CDMA 1xEV-DO Rev. A Gateway Solves Residential Broadband Internet Access for Rural Carrier Association Operator

Challenge:

Cellcom, a cellular/PCS service provider in rural Wisconsin and upper Michigan, wanted a reliable fixed wireless device to provide easy to use, plug-and-play residential broadband Internet access for its residential, small office/home office, enterprise and commercial customers. Cellcom initially trialed the Kyocera KR2 router, but experienced technical issues that caused the router to disconnect daily. Cellcom needed another solution.

Solution:

Axesstel's MV440 CDMA 1xEV-DO Rev. A Gateway provided the solution with its user friendly, integrated platform that virtually eliminates user error when operating the modem. An integrated Wi-Fi router allows access to broadband data from any room in a home or office and trouble-free set up of a local hotspot. In addition, the Gateway features receiver diversity for optimized device performance and user experience, with battery back-up to provide wire-free access from virtually any environment.

Benefits:

The MV440 enables this rural cellular/PCS service provider's customers to experience broadband data at speeds up to 3.1Mbps for high-speed access to email, the Internet, data intensive files and multi-media streaming. The four port Ethernet switch provides capacity to network multiple desktop PCs, laptop and Wi-Fi enabled devices, while offering the convenience and networking necessary to enable a variety of applications. A USB port provides an additional connection.

About Axesstel, Inc.

Axesstel (AMEX:AFT) is a recognized industry leader in the design and development of fixed wireless voice and broadband data products. Axesstel's best in class product portfolio includes broadband modems, 3G gateways, machine to machine applications, voice/data terminals, fixed wireless desktop phones and public call office phones for high-speed data and voice calling services. The company delivers innovative fixed wireless solutions to leading telecommunications operators and distributors worldwide. Axesstel is headquartered in San Diego, California with a research and development center in Seoul, South Korea. For more information on Axesstel, visit www.axesstel.com.

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995:

With the exception of historical information, the statements set forth above include forward-looking statements relating to market penetration and conditions, product capabilities and the timing of new product introductions which may affect future results and the future viability of Axesstel. Axesstel wishes to caution readers that actual results could differ materially from those suggested by the forward-looking statements due to risks and uncertainties and a number of important risk factors. Those factors include but are not limited to unforeseen manufacturing difficulties, unanticipated component shortages, competitive pricing pressures and the risk factors noted in Axesstel's filings with the Securities and Exchange Commission, such as the rapidly changing nature of technology and frequent introductions of new products and enhancements by competitors; the competitive nature of the markets for Axesstel's products; product and customer mix, Axesstel's need to gain market acceptance for its products; the risks of primary dependence on a limited number of significant customers; potential intellectual property-related litigation; Axesstel's need to attract and retain skilled personnel; and Axesstel's primary reliance on its sole contract manufacturer. All forward-looking statements are qualified in their entirety by this cautionary statement, and Axesstel undertakes no obligation to revise or update this press release to reflect events or circumstances occurring after this press release.
