FOR IMMEDIATE RELEASE

Pario Supplies the Nokia Siemens Networks RAN Solution to Wisconsin Operator
Mosaic Telecom Company expands 3G radio network

Lutz, Florida – December 1, 2009 - Pario Solutions, Inc., a hosted mobile services provider and GSM/UMTS Value-Added Reseller for Nokia Siemens Networks (NSN), announced today that they have signed an agreement with Mosaic Telecom, formerly Chibardun Cooperative of Cameron, Wisconsin, to expand Mosaic's 3G wireless radio access network. Under the agreement, Mosaic will receive 15 additional Nokia Siemens Networks base transceiver stations (BTSs) and enhancements to their HSDPA network. Additionally, Pario will provide installation, integration, optimization and ongoing support services for Mosaic's 3G network.

"We are extremely pleased that Mosaic Telecom selected Pario Solutions to supply NSN's infrastructure as well as provide network support services for their expansion. This decision sites Mosaic's satisfaction with the Nokia Siemens Networks radio access network solution and confidence in Pario's engineering and technical capabilities," said Jim O'Reilly, Vice President of Business Development at Pario.

"The team at Mosaic is looking forward to working with the experts at Pario to expand our network coverage and services," said Rick Vergin, CEO at Mosaic Telecom. Mosaic's network expansion is scheduled for the first quarter of 2010.
